

Abstract (200 words max => 40 words/item)

Background/motivation/context *What issues led to this work? What is the environment that makes this work interesting or important?*

.....

.....

.....

Aim/objective(s)/problem statement:

.....

.....

.....

Approach/method(s)/procedure(s)/materials:

.....

.....

.....

Results, and:

.....

.....

.....

Conclusion(s)/implications:

.....

.....

.....

Title

Unlike the worlds of newspaper reporting and marketing press releases, the title of a scientific paper should describe the aim of the work, not the results. Thus, a good title might be

Impact of temperature and pressure on the compositional uniformity of sputter-deposited aluminum alloys

The following news-style title, on the other hand, is not appropriate:

Optimizing temperature and pressure improves sputter-deposited aluminum alloy films
